CENTRAL SURPLUS

Sell Surplus Industrial Parts.
Get Paid in a Week.

Your idle MRO spares are depreciating on the shelf. We buy tier-1 surplus outright, estimate within 24 hours, pay all shipping, and pay you within one week of accepting the offer.

16	2,000+	750+	1 week
years buying	lots bought	sellers	to payment

What we buy

Tier-1 brands. New, unused, surplus, obsolete and discontinued. No minimum lot size. The more industrial parts the better.

- Bearings & Power Transmission
- PLC / PCB / Automation & Drives
- Industrial Automation & Electrical
- Electromechanical & Controls
- General MRO / Industrial Supplies

Who sells to us

Manufacturing plants, power generation, industrial OEMs and distributors, and MRO storerooms with spares that outlived the machine they were bought for. Plant closures, line changeovers and storeroom cleanouts.

How it works

1. **Send your list**
   Manufacturers, part numbers, quantities and condition. Photos help.

2. **Estimate within 24 hours**
   A real number, fast, so you can make the call.

3. **We ship it, we pay**
   Prepaid labels or freight pickup for bigger lots.

4. **Inspect & final offer**
   We count and grade what arrives and confirm one offer for the lot.

5. **Get paid**
   ACH or credit card within one week of accepting.

No list? Ship it. (Blind Bid)

No time to build a spreadsheet? Send a one-line description. We arrange pickup, then count, identify and value everything on arrival and send one final offer.

Typical lots we buy

Plant closure: bearing crib

Full crib of boxed tier-1 bearings sold as one lot before the auctioneer pallets it by weight. List in, estimate back within 24 hours, freight pickup on us.

Storeroom cleanout: automation spares

Drives, PLC cards and controls left over from retired lines. No spreadsheet needed: Blind Bid pickup, valued on arrival.

Line changeover: mixed MRO

Motors, pneumatics and power transmission for equipment that no longer runs. One buyer for the whole lot, paid within a week of acceptance.

Scenarios describe the kinds of lots we routinely buy. References from past sellers available on request.

Why sellers pick Central Surplus

- **Paid in a week**
  Not a quarter or two later. Some big surplus buyers take six months.
- **Outright purchase**
  No consignment, no waiting for your parts to sell piece by piece.
- **Estimate in 24 hours**
  Faster than the usual 2-3 day desktop valuation.
- **We pay shipping**
  Prepaid labels, or a truck for bigger lots.
- **Frees space and capital**
  Clear storeroom square footage and turn dead stock into cash your finance team can use.
- **16 years, 2,000+ lots**
  References available on request.

How we price your lot

Offers reflect current secondary-market demand for the exact part number, condition, original packaging, quantity and how fast it turns.

Fast-moving, packaged tier-1 parts bring the strongest offers. Obsolete or loose parts bring less. That's the market, not us.

The estimate is based on your list. The final offer is based on what arrives: one number for the whole lot. Once parts arrive they don't ship back, which is standard in industrial surplus buying.
